

LOWE ENGINEERING

PRODUCTS and SERVICES

Quality Assurance Registration to ISO 9001: 2008

Sampling & Conditioning Systems

For Steam, Hot Water, Hydrocarbons etc. Probes, Pipework, Valves, Coolers, Filters, Pressure Reduction & Instrumentation
Complete Overhaul, Refurbishment & Updating of Systems

Complete Sampling & Analysis Packages

On Line Chemical Analysis Systems on Racks, Skids, Panels or in Self Contained Cabins
complete with alarms, annunciation, signals & other ancillaries.
Experience of most Analysers for Power Stations, Refineries, Chemical Plant etc.

Continuous Emissions Monitoring Systems

Extractive Analysis for all Combustion Process applications.

Waste Water Sampling & Analysis Systems

On Line Analysis for all applications.

Gauge & Transmitter Panels

Wide variety of Styles, Mounting Arrangement & Instrument combinations for BOP

Maintenance & Service Contracts

Fully Scheduled Maintenance & Service Activities to support existing or new equipment
Carried out by qualified service personnel

HP & LP Injection Letdown Systems

Specifically designed for the Offshore Industry, detecting Dissolved Oxygen, are suitable for Safe & Hazardous Area locations

Fabrication

Specialist Fabrications in Aluminium (Marine & Commercial grades) & Stainless Steel.. Lloyds Class I capability.
Other exotic Materials also undertaken.

Project Management

Wide experience in rigorous Project Co-Ordination including Documentation Packages, Technical & Commercial Liaison,
Export Documentation, Packing and Shipping

Design

Vessels : PD 5500; ASME VIII

Sampling : ANSI 31.1/3; BS 6068/6; GDCD 163 (CEGB 764501); ESKOM NWS 1704, IBR etc..

Electrical : IEE 17th Edition; EMC Plus Clients Specifications.

Approvals : Lloyds, CEGB, MOD etc.

AUTOCAD Facilities

Lowe Engineering Ltd, Unit 3B, Kitson Road, Leeds, LS10 1NT England
