

Lowe Engineering Ltd have been manufacturing bespoke fabrications since 1930, in Stainless Steel, Aluminium and Carbon Steel. Other materials are also undertaken.

In addition to Vessel work custom made security doors and other items are fabricated.

These high quality fabrications are in the main, supplied to Petro-Chemical Industries, Process Industry, Utilities and the Marine and Defence markets. **LOWE** are ISO 9001 registered and have Lloyds Class 1 capabilities for pressure vessels to BS 5500 and ASME Codes. Welders are qualified to BS EN 288-4, ASME IX.

LOWE's design office utilises AutoCAD R 14 and with rigorous QA systems, dedicated materials and production control procedures in place, are well placed to manage complete projects.
