

SECURITY DOORS

Weather tight & Vandal-Proof

Manufactured in Aluminium Alloy

Typical Applications

Broadcasting Transmitter Stations
Chemical Storage Enclosures
Telephone Relay Stations
Computer Security Stores
Inflammable Gas & Liquid Stores
Sub Stations / Explosive Stores
Pumping Stations / Control cabins

Vandal-Proof Doors

Developed to satisfy stringent security requirements. The doors are mounted in a strong Aluminium frame, with partially hidden hinges and secured with marine clips. They have many other vandal-proof features.

Lowe Standard doors are manufactured in a wide range of sizes and also can be custom built to include additional features such as: - Louvre panels mounted in or above the door, with fixed or tilting blades.

Double doors of equal or unequal size, with or without windows!

Security Grills

Manufactured from weldable high tensile steel with either flat or angles frames and complete with birdmesh.

Aluminium Security Ventilation Ducts

Manufactured to customer's requirements and dimensions for wall or roof mounting complete with birdmesh and internal baffles if required.

Economy Doors

From the above equipment range expertise, **Low**e have now developed designs which incorporate many key features, which are specifically adapted to industrial type applications to produce more cost-conscious products.

Steel Fire Rated Doors

These are also available in addition to our standard door range.
