

## 8 SERIES SAMPLE COOLER

### FEATURES

- Compact straight thro' design
- Suitable for on-line and Manual Grab Sampling
- 6m & 11m coil length versions available
- Removable shell to allow coil inspections
- Cooling water drain plug
- Back plate mounting facility

The 8 Series Sample Cooler's compact design is ideal for installations where space is limited and/or cooling water manifolds are located at the top and bottom of the frame/wall.

It is suitable for hot water and condensate samples, and can also be used on some steam samples.

To confirm suitability for your application a performance calculation will be carried out subject to provision of your operational parameters.

As with the full range of Lowe Sample Coolers, due to the design, a full refurbishment service can be offered to further extend the service life of your cooler.

Should you require assistance with additional components to complete your installation then please contact our Sales office for further information.

**Connections:** Sample 1/4"OD tube tails which can be shortened or formed to suit your installation. Cooling water connections 1/2"BSPT are located on the Cooler lid and Cooler base.

Adapters can be provided for both the sample and cooling water connections.

**Dimensions:** 90mm(shell dia), weight 6m - 5.5Kg/11m - 6.8Kg
