LOWE Standard doors are manufactured bespoke to every building, customising can include additional features such as: - Louvre panels mounted in or above the door, with fixed blades in the listed combinations:-

Weather tight sealing

Originating from Lowes design for use on ships wheel houses the construction of the door ensures that a tight dust and water seal are achieved.

Security Grills

Manufactured from weldable high tensile steel with either flat or angles frames and complete with birdmesh.

Aluminium Security Ventilation Ducts

Manufactured to customers requirements and dimensions for wall or roof mounting complete with birdmesh and internal baffles if required.
